# HOW TO CARE FOR YOUR WIG!

## 1. WASHING

Add a generous amount of shampoo in 1 litre of cold water. Shake the wig slightly and place it in. Let it soak for 10 minutes and rinse thoroughly in clean cold water. Do not rub!

## 2. BALM FOR THE ENDS

For a healthy, shiny result, add a little hair conditioner to 1 litre of cold water. Let the wig soak for 10 minutes and rinse thoroughly. Do not use heat to dry. Let the wig dry naturally.

## 3. DRY

Gently wipe off excess water and press lightly with a towel. Place the wig on a special head if you have one or on a towel and let it dry naturally. Never dry your wig by rubbing it with a towel and never comb it while it is still wet! When it dries, you will find that the wig's original style has returned. Your wig should be washed every 2 or 3 weeks if worn daily!

*Attention: Never use a hair dryer, iron or any kind of heated accessories on synthetic hair wigs. Keep your wig away from heat or fire. Do not leave it in the car when it is hot as the high temperature may cause irreparable damage to the wig.*
